**Subject:** Announcing New Agency Senior Leaders

Colleagues,

I am pleased to report that we have new senior leaders joining the agency. Please join me in welcoming Peter Wright and Chad McIntosh to EPA.

**Peter Wright, Special Counsel to the Administrator:** Peter Wright, who has also been nominated to be the Assistant Administrator for the Office of Land and Emergency Management, will join the agency on July 9. Peter brings exceptional experience to EPA's cleanup programs and has the expertise necessary to implement EPA's ambitious goals for cleaning up the nation's contaminated lands quickly and thoroughly. Throughout his career, he has provided legal support for Superfund and other remediation sites, including work at Monsanto and with environmental practices at two law firms. Since 1999, he has worked at Dow Chemical Company where he served as Managing Counsel for Environmental Health and Safety, leading the company's strategies regarding Superfund sites and other federal and state-led remediation matters. In addition, Peter has been a leader of the American Bar Association's Environment, Energy and Resources Section and volunteered his time, alongside many from EPA, on the RCRA Corrective Action Project.

**W. Charles "Chad" McIntosh, Special Counsel to the Administrator:** Chad McIntosh, who has also been nominated to be the Assistant Administrator for International and Tribal Affairs, will join the agency on July 9. Chad's unique background as an engineer and attorney in global environmental compliance makes him a valuable asset and well-suited to advise the Acting Administrator on international and tribal matters. Since 1998, he has worked at Ford Motor Company, most recently serving as Manager of Global Environmental Policy, where he led efforts to improve environmental permitting, compliance, and environmental metrics at the company's manufacturing facilities in the United States, Canada, and Europe. Prior to joining Ford, Chad served as Deputy Director at the Michigan Department of Environmental Quality, where he was responsible for environmental permitting and compliance activities. He also worked closely with state and tribal leaders on comprehensive environmental and regulatory reform in Michigan, including codifying the environmental and natural resources statutes, and improving the state's wastewater infrastructure.

Ryan Jackson
